

Are you interested in learning more about severe weather ? What are the key details to look for on a radar image ? What is mesoscale analysis? Listen to a discussion on advanced storm spotting and storm structure. Understand the role of radio operations during severe weather.

Join the National Weather Service and the Central Ohio Severe Weather Network on Saturday April 20, 2024 at 9 AM at the Bruce E. Siegel Center to learn more. The center is located at Mount Carmel Hospital, 6001 East Broad Street, Columbus, Ohio, 43213.

This seminar will take you beyond basic spotter training as you take an inside look at the technology and data used by the National Weather Service to produce warnings that aid in the safety of life and property during severe weather. Review a case study led by NWS experts and understand how weather spotters contribute to the NWS mission.

The Siegel Center is located on the northwest corner of the hospital complex just west of the emergency room entrance. See the map below for the hospital location.

Parking is available northwest and southwest of the Siegel Center on surface lots.

Registration is required as seating is limited. Go to <https://bit.ly/3SEFZkq> to register. If further information is required, please send an e-mail to:
